

Established in 1966, R.F.Mote is a prominent Canadian manufacturer of racks, cabinets, wall mount cabinets, networking and co-location cabinets. To complement this line, we also offer cable management, pdu's, shelving and cooling options. Additionally we manufacture Data centre cage and aisle containment products to further serve this market.

Given our history R.F.Mote continues to offer the service of custom metal fabrication of such items as electronics enclosures, chassis and faceplates, kiosks, battery enclosures and telco products.

We welcome any special requirement, be it a custom configuration of our standard products, special sizes or features, or something completely new. Together with our industry leading distribution partners we are confident that we can surpass customer expectations from design to implementation.

We look forward to working with you!
